

Is your firm looking for the **knowledge advantage?**

We created the Blueprint.

Developed by Tiger Eye, Blueprint is the knowledge management tool for iManage designed from the ground up for law firms.

Create a curated collection of knowledge and take advantage of the wealth of knowledge already in the firm – get in touch to find out more.

Blueprint integrates seamlessly with iManage to give law firms a simple but powerful Knowledge Management system.

Your firm's knowledge, managed

Tiger Eye have worked with leading law firms to identify and address many of the key knowledge management requirements.

The result is Blueprint, a tool that allows firms to build a curated collection of best practice documents, and track usage metrics across the firm to enable detailed reporting.

Blueprint is fully integrated with iManage, the industry-standard DMS, and firms can create a collection of gatekeeper-approved knowledge. Workflows have been designed with extensive KM team consultation to simplify know-how submission for lawyers and maximise user engagement. Users can access documents using Blueprint's in-built search platform or integrate with an existing search engine.

Seeing the bigger picture

The knowledge embedded in your firm can now be accessed throughout the practice, facilitating decision making, encouraging the free flow of ideas and improving service to clients.

Because documents are reviewed and approved, partners and their teams have the confidence that they are up to date and definitive.

Input from leading firms along with Tiger Eye's wide experience managing IT systems for legal clients, means that Blueprint is a knowledge management tool that answers law firms' needs in a way no other software can.

If you would like to see how Blueprint could work in your firm, get in touch and request a demo.
